Main Question: How do you think computer intrusion occurs?

- How old are you?
- What is your current occupation
- Do you have any experience working within IT or with computers?
- Do you have an interest in computers?
- How often do you use a computer?
- For what purpose do you use the computer?
- --
- Who do you think poses a threat to you in terms of computer and/or information security?
- Why do you think you would be the target of a type of attack, what kind of attack?
- Do you actively take any precautions in order to secure yourself against computer intrusion?
- --
- You notice a mail has been sent from your e-mail account, but you weren't the one who sent it, what do you think may have happened?
- Why do you think someone may have done this, or why do you think it may have happened?
- --
- How do you choose a password? When do you feel a password is sufficiently secure?
- You notice someone else has changed the password of your account at some random unimportant forum. How do you think this may have happened?
- What would you do in response to this hypothetical event?
- --
- You receive an email containing a link from a friend who normally doesn't send emails, what do you do?
- Would it have made any difference if it was a facebook or skype message instead of an email?
- --
- How do you think computer intrusion happens?
- Why do you think computer intrusion happens?
- What do you think of the 'hacking' you often see in tv-shows or movies?
- Do you have any own thoughts on the matter or anything you would like to add?

Notes:
